

The Nigeria Ward Based Technology Program: A catalyst for indigenous inventions and innovations as tool for rural development

JohnJohn Uket

"The Nigeria Ward Based Technology Program: A catalyst for indigenous inventions and innovations as tools for rural development" shall beam its focus and presentation on viable approaches by which government of third world or developing countries can leverage on strategic platforms to encourage and of course mainstream indigenous inventions and innovations as basic tools for bring development to rural dwellers.

The paper shall proffer solutions to the lack of a national plan in both government and private sectors that prioritizes indigenous inventions and inventions as the key to improving livelihood in communities.

Also, the paper shall share the Nigeria's innovation system successes, challenges and ultimately its roles in redefining the socio-economic paradigm of Nigeria as a developing nation."
