# MESSAGE FROM THE ACTING CHAIR

It is with some disbelief that we find ourselves at the end of the academic year as it does not seem all that long ago that it was September and we were welcoming Criminology to our corner of the world as well as welcoming a new cohort of graduate students and our Marie-Curie postdoctoral scholar, Guilia Valpione, all of whom now seem as if they have been here for years. The same is true of sharing our space with Criminology. It is hard to remember a time when they were not just down the hall. And yet, when I think back on all that has happened—the many graduate seminars from Hegel to Freud to Heidegger to Dussel (to name only a few), all the undergraduate classes taught, meetings of the Philosophy Circle on topics ranging from hospitality to totalitarian terror, the DUOS teams and a wonderful afternoon discussing their work, our newly inaugurated philosophy film series (thank you, Sujitha!), visiting lectures by Kristi Sweet, James Martel, Linda Alcoff, Perry Zurn, and Kris Seeley, and our many dinners at Paula's where we continued discussions with our speakers, welcomed our visiting prospective graduate students and celebrated our graduating seniors—it seems as if it has been much longer than nine months since we began the year together.

A few weeks ago on a Sunday, I happened to be in the office (carrying in a bookcase that I had not nicked from the common areas—I continue to be chastened from the September “episode”) and was struck by how even on a Sunday life has returned to “Plato's Place.” Certainly, it had never fully left, but looking around at the bulletin boards with their announcements of lectures and meetings of the Philosophy Circle, at tables and chairs while empty still a bit askew, giving the impression that students recently had occupied them, at well-used coffee pots and a microwave whose door was ajar as if someone had just heated up lunch, all gave the sense of a place where philosophy is alive and well, a place where the embodied life of the mind is flourishing in the rich sense of Aristotle's Eudaimonia. We owe a large part of our flourishing to Regina Robinson, whose arrival last June not only put the department to rights in its daily existence but restored our spirits with her sense of humor and her unfailing concern for all of us.

Thank you all for your support this year as I muddled through as Acting Chair. I want to thank especially Avery Goldman, our Undergraduate Director, Elizabeth Rottenberg, our Associate Chair, and Kevin Thompson, our Director of Graduate Studies, for all their work this year. Along with Regina, they have kept our ship afloat and flourishing.

Wishing everyone a restful and restorative summer break,

-Peg

### Restoration, Reactivation, Reorientation: Husserl's Method for a Historical Critique of the Present

In the late 1920s and early 1930s, Husserl developed a method of historical reflection (Besinnung) meant to guide and realize his transcendental eidetic project. This method of critique, which falls within the purview of Husserl's framework of transcendental clarification (Klärung), is a response to what he saw as the crisis of science, philosophy, and, ultimately, humanity. This paper offers a deep dive into three core aspects of Husserl's Besinnung: restoration (Restitution), reactivation (Reaktivierung), and reorientation (Umwendung). Whereas restoration focuses on the pre-giveness of experiential evidence, reactivation targets the sedimented layers of this evidence. My main contentions in this paper are threefold. 1) Restoration and reactivation condition, in a performative manner, the possibility of a radical reorientation toward the historicity of this evidence. 2) This sustained reorientation qualifies both the attitudinal shift of the phenomenological reductions and our grasp of transcendental necessity. 3) This transcendental-historical reorientation, in turn, has self-referential implications: critique is eo ipso radical self-critique – a self-critique (Selbstbesinnung) that necessarily entails the (re)evaluation of methodological commitments and theoretical accomplishments (Leistungen) alike. In short, the performativity we see at work at the level of domain-specific analyses also unfolds at the higher-order, meta-phenomenological level. The paper closes with reflections on the implications of this self-referentiality for understanding transcendental phenomenology as a qualitatively distinctive kind of radical immanent critique.

## Sean Kirkland

Research in Phenomenology published Sean's conversation with Daniel Dahlstrom (Boston University), which took place originally in a SPEP book panel devoted to Sean's book, *Heidegger and the Destruction of Aristotle: On How to Read the Tradition* (Northwestern, 2023). (The original panel included a review by our own Cameron Coates as well, who focused more on the Aristotelian side and less on the contemporary and phenomenological aspects of the book.) Sean's response to Dan is entitled, "Historicism and the Challenge of Thinking Our Concepts Otherwise" (RinP 55, 2025, 267-274).

---

After conquering his considerable nerves about the prospect, Sean appeared on the podcast "Hotel Bar Sessions," with our own Rick Lee and Leigh Johnson (American University). The conversation was about Sean's most recent book, *Aristotle and Tragic Temporality*, and it can be heard here (or wherever you get your podcasts): [Tragic Temporality \(with Sean Kirkland\)](#).

**Note:** In preparation for his appearance, Sean listened to earlier episodes of the show, among them the sessions with [Peg Birmingham](#) on fascism and [Michael Naas](#) on hospitality, which were both fabulous!

## Kevin Thompson

Congratulations to Kevin, recipient of the 2025 Excellence in Teaching Award! Kevin is an extraordinary lecturer, matched only by the countless hours he devotes to meeting with and advising his students, undergraduates and graduates alike. His work over the past six years as Director of Graduate Studies for the Philosophy Department sets a new standard for excellence says Peg Birmingham, Acting Chair, Philosophy.

Rafael  
Vizcaino

This year, Rafael published an article on Dussel's reading of Marx in the *Journal of the American Academy of Religion*, the leading international journal in the academic study of religion.

He also returned to his “decolonizing spiritualities” project, which began as a special journal issue published in 2022 and is currently expanding into an edited anthology that will be published with a university press.

Rafael is in the final stages of completing his first monograph (under review since last year) and has kept busy by further outlining the sequel to that monograph, as well as drafting the frames of a few articles on specific problems within Dussel's ethics and politics of liberation.

The INC Book Club will be reading together Susan Griffin's eco-feminist classic, *Woman and Nature: the roaring inside her* (Berkeley: Counterpoint Press, 1978).

This utterly original and powerful text first diagnoses the way in which these two concepts, "nature" and "woman," have been associated with one another throughout the history of Western scientific and philosophical thinking, to the detriment of both, then draws out some especially subtle and nefarious aspects of that association, and finally tries to initiate a sort of re-orientation of our relationship to the natural world and to one another.
