

Rejuvenation of Urban Space

with Affordable Housing, Retail stores and urban farm

2900 W Medill Avenue, Chicago, IL

Urban space with affordable housing, community garden, retail stores, urban farming as well as market place.

Built environment around the site with the development in the proposed site area

Green space area throughout the site with permeable pavements and the streetscape joining each built environments

Proposed building from the Medill Avenue

The lower level consists of the retail stores and cafe and second floor consists of the restaurant and roof top garden. The roof top garden facing towards the Milwaukee avenue gives the vision of the vibrant avenue and the community garden. Rest of the floor areas consists of the affordable housing units focusing the working class residents. Hence, creating sustainable urban environment using the green roofs, solar panels, permeable pavement throughout the site.

Birds eye view of Community garden with bike track

View from the north east side with the commercial/retail stores

Affordable housing unit with retail stores, green spaces

View from the Medill Avenue
