Course Schedule

Three core learning modules are spread across five weeks of learning time in this course. Accordingly, students should plan to spend 10-12 days on each module. The reading assignments and the learning activities are progressive, meaning that the later ones build upon the earlier ones; due dates are given to ensure that this “scaffolded” learning develops accordingly. In Module 1, we study the “Categorical” model of ethics, and this perspective is the fundamental basis of the Western ethical tradition. All ethical models which follow are, to some degree, responses to it. A successful demonstration of

the learning outcomes for Module 1, then, is a major indicator of your ability to complete the learning in the course.
